

CELSIUS™
PERFORMANCE GLASS

keeping you **cooler** in summer
and **warmer** in winter

Celsius Glass: Easy Clean information & advice

Easy Clean is a permanent glass improvement system, which, amongst other benefits, provides easy clean, low maintenance performance, reducing the need for cleaning by up to 70%.

Features of the surface protection are:

- Ease of cleaning (reducing cleaning by up to 70%)
- Dirt and contaminants are washed away
- Non-stick performance against organic and inorganic contaminants.
- Resistant to high pressure cleaners
- Resistant to temperatures up to 350° C.
- Crystal clear coating-invisible.
- Strong water droplet “beading effect”
- UV stable

Care Instructions:

Periodic cleaning of the glass surface will be required according to conditions.

Use any suitable household glass-cleaning product and, whilst it is possible to use other mild detergents/shampoos (pH7), aggressive detergents can cause temporary damage to the surface, and should not be used.

Avoid cleaning agents containing strong surfactants.

Do not use abrasive scrubbing equipment for cleaning.

Note: With natural rainwater, you should not experience any residual marks on the surface of the glass. If any appear at any time, they are most likely to be caused by lime scale, which is due to the lime present in all tap water.

Have you experienced these marks after spraying a hose over the roof or window? If so, we would suggest a wash down of the roof to remove the marks, then remove excess water with a suitable rubber blade.

Enjoy the time you've saved!
