

CELSIUS™  
PERFORMANCE GLASS

keeping you **cooler** in summer  
and **warmer** in winter

## Celsius glass maintenance information

When Celsius is manufactured 'Easy Clean' is applied, which uses a non-stick technology.

Easy Clean provides very effective and long-lasting 'non-stick' protection, making glass much easier to clean and keep clean, and maintaining clarity and visual appeal much longer.

The Easy Clean becomes an integral part of the surface, which gives exceptional resistance to weathering, atmospheric pollution and staining.

As a general guideline, the service life of Easy Clean protected glass is 10 years.

Celsius performance glass does require cleaning but less frequently than standard glass.

Cleaning can be reduced by as much as 70%. It is recommended that the glass be cleaned using a suitable household glass cleaning product or a PH Neutral (PH 7) detergent.\*

**NB. Do not use any product that is abrasive, as this will scratch the surface of the glass, resulting in the removal of the coating.**

\*For installations before April 2012: Maintenance can be reduced by as much as 50% over standard glass. It is recommended that the glass be cleaned using a mild solution of soapy water
